EDUCATION

Pune University

Bachelor of Engineering in Computer Science

CGPA: 10/10 | [Marksheet](#)

2023 – 2027

Deccan Education Society

HSC - Science

MHT-CET: 95.45%ile

2021 – 2023

EXPERIENCE

Arsha Consultants LLC, USA

Web Development Intern

Jan – May 2026

(Remote)

- Managed GitHub workflows, deployment pipelines, API integrations, and map-based visualizations for a scalable PCMC web platform

Google Developers Group (GDG)

Web Development Head

2025 – Present

- Led cross-functional development teams, organized technical initiatives, and mentored students in modern web technologies

SPCL

Backend Intern

Aug – Sept 2025

- Developed scalable backend services using Java, Spring Boot, REST APIs, Hibernate/JPA, MySQL, NoSQL, Docker, and system design principles

PROJECTS

AyurSutra – AI Ayurveda Platform | *Next.js, React, Spring Boot, Python, MySQL*

[Link](#)

- Architected a full-stack healthcare platform for Ayurvedic clinics enabling AI-assisted report generation, smart patient management, and centralized medical history tracking; successfully sold and recommended by doctors
- Led backend architecture and microservice integration using Spring Boot, REST APIs, Hibernate/JPA, JWT authentication, asynchronous processing, and optimized relational database systems

Plutus AI – Multi-Agent Marketing System | *AI Agents, Workflow Orchestration*

[Link](#)

- Built an autonomous AI-agent workflow system during an international Cardano hackathon; selected among finalist teams and presented in Bengaluru
- Implemented multi-agent orchestration pipelines integrating LLM workflows, prompt chaining, context-aware execution, and scalable AI-driven automation

AI Startup Analyzer | *Spring Boot, AI Agents, Docker, Next.js, MySQL*

[Link](#)

- Developed an AI-powered platform for analyzing founder discussions, pitch decks, market positioning, and collaboration insights using autonomous agent workflows
- Engineered scalable backend systems using Spring Boot, Hibernate/JPA, REST APIs, JWT authentication, Dockerized microservices, and optimized MySQL query pipelines

DBT –(PCMC Initiative) | *React, Python, FastAPI, Database Systems*

[Link](#)

- Developed a real-time vector-borne disease monitoring and operational intelligence platform for PCMC, featuring GIS-based risk mapping, hotspot visualization and preventive action tracking across Pune zones
- Full-stack architecture using React, FastAPI, and database systems with integrated disease-risk assessment workflows, operational analytics, and data-driven outbreak response capabilities for municipal health operations

TECHNICAL SKILLS

Languages: Java, Python, C++, C, SQL, HTML5, CSS

Frameworks & Technologies: Spring Boot, Hibernate/JPA, React.js, FastAPI, JDBC, REST APIs, Microservices, MySQL, NoSQL

Developer Tools: Git, GitHub, Docker, Maven, Postman, AWS, Vercel, VS Code, PyCharm, Eclipse

AI/ML: Scikit-learn, LLM Integration, AI agents Automation, Claude Code [multi-agent]

Operating Systems: Windows, Ubuntu, Unix/Linux basics

Extra Curricular: State-level Gymnastics Player and Football Player. [Certificates](#)
